

within 20 working days of filing its report.

6. A company's proposed corrective action plan must include:

(a) A description of the recall action (refund, repair, or replacement) that the company will take to eliminate the identified risk.

(b) Sufficient product design, incident, and testing information to allow the staff to determine whether the proposed action corrects the identified problem and the problem is limited to the model(s) and production dates identified by the company. Such information should include, but is not limited to: consumer complaints, test data, engineering drawings, material specifications, samples of product, and/or component parts, as needed. If the needed information and documentation is being compiled, but is not yet available, the company must provide the date it expects to forward the information to CPSC. CPSC staff must have sufficient time to review the information and respond within the 20 working day time limit.

(c) Usually, the company's proposed plan must include notice of the recall to distributors, retailers, and consumers of the subject product. The notice must describe the product, the hazard, the number and type of injuries that have been reported, the type of injury that can occur, and the action to be taken in plain language understandable to the people to whom the notice is directed. Generally, the plan must include a joint news release with the Commission announcing the recall, letters and instructions to retailers and distributors, point-of-purchase posters, and, depending upon the level of risk, the population at risk, age and number of products involved, additional notice. Supplementary notice may include a video news release, print and/or radio advertisements, incentives or bounties to encourage consumer response, posters for specific audiences, such as for posting in pediatricians' offices, medical clinics, national parks and campgrounds, and repair shops (see *Corrective Action Handbook*, available for CPSC Division of Corrective Actions). In those cases where all purchasers can be contacted directly, a news release may not be necessary.

(d) An agreement that the Commission may publicize the terms of the plan and inform the public of the nature and the extent of the alleged hazard. The consumer notice should be targeted to reach a significant portion of the public likely to have purchased the subject product. (See 16 CFR

§ 1115.20(a) and CPSC *Corrective Action Handbook*.)

7. The corrective action plan and notice must be acceptable to the staff. The staff will consider whether the corrective action plan adequately addresses the risk of injury presented by the product and whether the notice and corrective action plan are designed to make the plan as effective as is reasonably possible given the nature of the product and the risk.

8. The staff will provide expedited review of every proposal submitted and work with every interested company to develop an acceptable corrective action plan that can be implemented within 20 working days. However, there may be cases where the staff cannot evaluate and approve implementation of a corrective action plan within 20 working days, even though the company has submitted all the necessary information in a timely manner. Similarly, there may be cases where the staff and firm agree that notice and corrective action should occur after 20 working days have passed (for example, in the case of a seasonal product). So long as delay is not caused by or the fault of the company, the staff generally will not make a preliminary hazard determination.

9. If corrective action is implemented within 20 working days, staff will acknowledge in writing that the company has submitted information under section 15(b) of the CPSA and that, based on available information, the proposed corrective action plan is adequate. In addition, the staff will advise the company that it has a continuing obligation to report new or different information that may affect the scope, prevalence or seriousness of the defect or hazard. Once the company implements its corrective action plan, the staff will monitor its progress.

10. If the company does not implement a corrective action acceptable to the staff within 20 working days, the staff will continue its evaluation and will preliminarily determine whether the product contains a defect that creates a substantial risk of injury to children under the FHSA or presents a substantial product hazard under the CPSA. The staff will so inform the company.

11. A company should not delay its report under section 15(b) of the CPSA in order to prepare a corrective action plan. The staff will not refrain from making a preliminary determination if the information available suggests that a company did so.

Dated: July 21, 1997.

Todd A. Stevenson,

Deputy Secretary, Consumer Product Safety Commission.
